Proposed Solution Template:

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Customers find it difficult to search, compare, and purchase books easily. Sellers also face challenges in managing book inventory and orders manually.
2.	Idea / Solution description	Develop a Book Store Web Application using the MERN stack that allows users to browse, search, and buy books online. It also provides separate dashboards for Admin and Sellers to manage books, users, and orders efficiently.
3.	Novelty / Uniqueness	The application combines book browsing, secure login, role-based access (Admin, Seller, User), inventory management, and order management in one easy-to-use platform.
4.	Social Impact / Customer Satisfaction	The solution saves users' time, makes book purchasing more convenient, improves access to books, and helps sellers manage their business more efficiently.
5.	Business Model (Revenue Model)	Revenue can be generated through book sales, seller registration fees, premium memberships, advertisements, and promotional offers.
6.	Scalability of the Solution	The system can be expanded by adding online payments, AI-based book recommendations, book reviews, multilingual support, mobile applications, and cloud deployment
