

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	14 July 2026
Team ID	
Project Name	Book Store
Maximum Marks	4 Marks

Functional Requirements:

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
--------	-------------------------------	------------------------------------

FR-1	User Registration	
------	-------------------	--

	Registration through Form
--	---------------------------

	User Login
--	------------

	Password Validation
--	---------------------

FR-2	User Authentication	
------	---------------------	--

	Secure Login using Email & Password
--	-------------------------------------

	Logout
--	--------

	JWT Authentication
--	--------------------

FR-3	Book Management	
------	-----------------	--

	View Books
--	------------

	Search Books
--	--------------

	View Book Details
--	-------------------

FR-4	Shopping Cart	
------	---------------	--

	Add Books to Cart
--	-------------------

	Remove Books from Cart
--	------------------------

	Update Cart Quantity
--	----------------------

FR-5	Order Management	
------	------------------	--

	Place Order
--	-------------

	View Order History
--	--------------------

	Order Confirmation
--	--------------------

FR-6	Seller Dashboard	Add New Books
		Update Book Details
		Delete Books
		Manage Inventory
FR-7	Admin Dashboard	Manage Users
		Manage Sellers
		Manage Books
		View Orders
FR-8	Profile Management	View Profile
		Update Profile Information
FR-9	Search & Categories	Search by Book Title
		Filter by Category
		Browse Books

Non-Functional Requirements

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The application should have a simple, user-friendly, and responsive interface that is easy to navigate.
NFR-2	Security	User data should be protected using JWT authentication, password encryption, and secure API access.

NFR-3	Reliability	The system should provide accurate results and operate without failures during normal usage.
NFR-4	Performance	Pages should load quickly, and book search and order processing should be completed efficiently.
NFR-5	Availability	The application should be available to users 24×7 with minimal downtime.
NFR-6	Scalability	The system should support the addition of more users, books, sellers, and future features without affecting performance.
NFR-7	Maintainability	The application should be easy to update, debug, and maintain using a modular code structure.
NFR-8	Compatibility	The application should work correctly on modern web browsers and different screen sizes (desktop, tablet, and mobile).
